(54) Title: A STAINLESS STEEL STRIP COATED WITH A DECORATIVE LAYER

(57) Abstract: The invention relates to a coated stainless steel strip (1) product with an evenly distributed layer (2) on one side or both sides of said strip. Said layer has a decorative appearance, the thickness of said layer is maximally 10 µm, the tolerance of said layer is maximally +/- 30 % of the layer thickness, the parameter value of L^* , a^* b^* is respectively $0 < L^* < 95$, $-66 < a^* < 64$, $-90 < b^* < 70$, the tolerance of said decorative appearance as expressed in terms of ΔE is maximally 15 and the layer has such a good adhesion so that the coated steel strip when tested in soft-annealed condition can be bent more than 90° over a radius (5) maximally equal to $5 \cdot t$, where t is the thickness of said strip, without showing any tendency to flaking or the like.
